

## Mariam Buachidze's Erasmus+ Staff Experience at HUSS in the framework of ICM

25/04/2022-28/04/2022

I visited the Hungarian University of Sports Science (HUSS), in Budapest. During the visit, several events were held, including: Meeting about HUSS Physical Education teacher training program; visit of HUSS Dietetic Laboratory; visit of the Library; meeting about HUSS Sport Coaching BSc and MSc programs; meeting with the Director of International Relations center about prospective areas of collaboration and Eu projects.

I got acquainted with some of the work processes of the university which I think was quite fruitful for me because after I returned to Georgia, I try to introduce some innovations in GSTUPS based on the experience gained in Hungary.

The given visit for bilateral cooperation was also fruitful, where we talked about future plans and discussed various programs. I would also like to mention that everything was well organized and I think this visit will make a significant contribution to deepening the cooperation between the two universities.
